

Full Stack Web Developer

With over three years of experience as a Full Stack Developer, I have honed my skills in technologies like **JavaScript, React.js, Node.js, Express.js, and SQL databases**. My journey began with programming studies at EGG and continued with intensive self-learning and formal education through the **Full Stack Web Developer course at Henry**.

I bring **professional experience** both as a **freelancer** and as part of a local company, **IDPartners**, where I applied my abilities to real-world projects and collaborated with multidisciplinary teams. I am highly adaptable and excel at integrating into workgroups, maintaining clear communication, and contributing effectively. **My focus is always on adding value, learning, and growing alongside my team.**

Work History

2024-01 - present	Full Stack Web Developer <i>TechWeb Studio, Mendoza</i> Scalable E-commerce: Created an online store adaptable to various types of businesses, implementing technologies such as React.js, Node.js, Express.js, Google Sheets, Cloudinary, AWS, Firebase, Redux, GitHub . Resulted in a 30% increase in client engagement. Landing Pages: Developed high-performance pages aimed at attracting clients and improving the digital presence of small businesses using React.js, Firebase, Redux, GitHub . Improved lead conversion rates by 15%.
2024-01 - present	AI-Generated Code Validator <i>Outlier, Remote</i> Validated and reviewed code in languages such as JavaScript, C, and Python , ensuring compliance with prompt requirements and established quality standards. Conducted logical analysis and identified errors in AI-generated code, proposing solutions. Optimized performance and efficiency by implementing improvements in code structure and functionality. Collaborated in continuous improvement processes, providing feedback on the accuracy and functionality of AI-generated code to optimize algorithms.
2024-10 - 2024-12	Full Stack Developer/Data Integration Specialist <i>IdPartners, Mendoza</i> Data Management with Pipedrive: Implemented solutions for importing, exporting, and modifying data, ensuring seamless integration with the company's internal systems. Automation with Google Apps Script: Developed custom scripts to connect Pipedrive with Google Sheets, enabling efficient data synchronization and manipulation. Workflow Optimization: Created specific functionalities to manage business information, improving data handling efficiency. SDK Exploration: Configured and used an SDK to extend integration and customization capabilities within the Pipedrive environment. Technologies used: Google Apps Script, Pipedrive API, SDK, Google Sheets.

Education

2023-01 - 2024-09	Full Stack Web Development <i>Henry, Mendoza, Finalizado</i> Completed an intensive full-stack web development course with over 800

Soft skills

- Teamwork and Collaboration
- Technical writing and documentation
- Agile methodologies
- Communication skills
- Empathy
- Initiative and commitment to company's activities
- Excellent organizational skills

hours of theoretical and practical training, including individual and group projects.

Projects

2024-07
- 2024-08

Full Stack Developer

Pokémon-Themed Application

Designed and developed an interactive application with a Pokémon theme, built from scratch.

Backend: Implemented a server using **Node.js** and **Express.js**, integrating data from an external API to provide real-time information.

Frontend: Created an attractive and responsive interface, including advanced filtering (by type and characteristics), dynamic search, and sorting (alphabetically and by type).

Additional Features: Managed images with **Cloudinary** to optimize loading and storage.

Testing and Documentation: Used **Postman** to test routes and ensure a functional and efficient RESTful API.

Styling: Applied modular design with **CSS Modules** for a smooth user experience across devices.

Technologies used: **Node.js**, **React.js**, **Redux**, **Express.js**, **Cloudinary**, **Postman**, **CSS Modules**.

2024-08
- 2024-09

Back end developer

Clothing E-commerce Backend

Fully developed the backend of a clothing e-commerce project from scratch.

Server Creation: Built and implemented the server using Node.js and Express.js, configuring endpoints, controllers, and database models.

Database and Deployment: Deployed the database and backend on Render, ensuring efficient server-database communication.

Email Notifications: Integrated Nodemailer for automated welcome and purchase confirmation emails.

API Structure: Contributed to creating a robust API structure for efficient communication with the frontend.

Optimization and Maintenance: Enhanced the stability and scalability of the application through best practices in architectural design.

Technologies used: **Node.js**, **Express.js**, **Nodemailer**, **Render**, **PostgreSQL**, **JavaScript**.
